Screen 1: Home Page

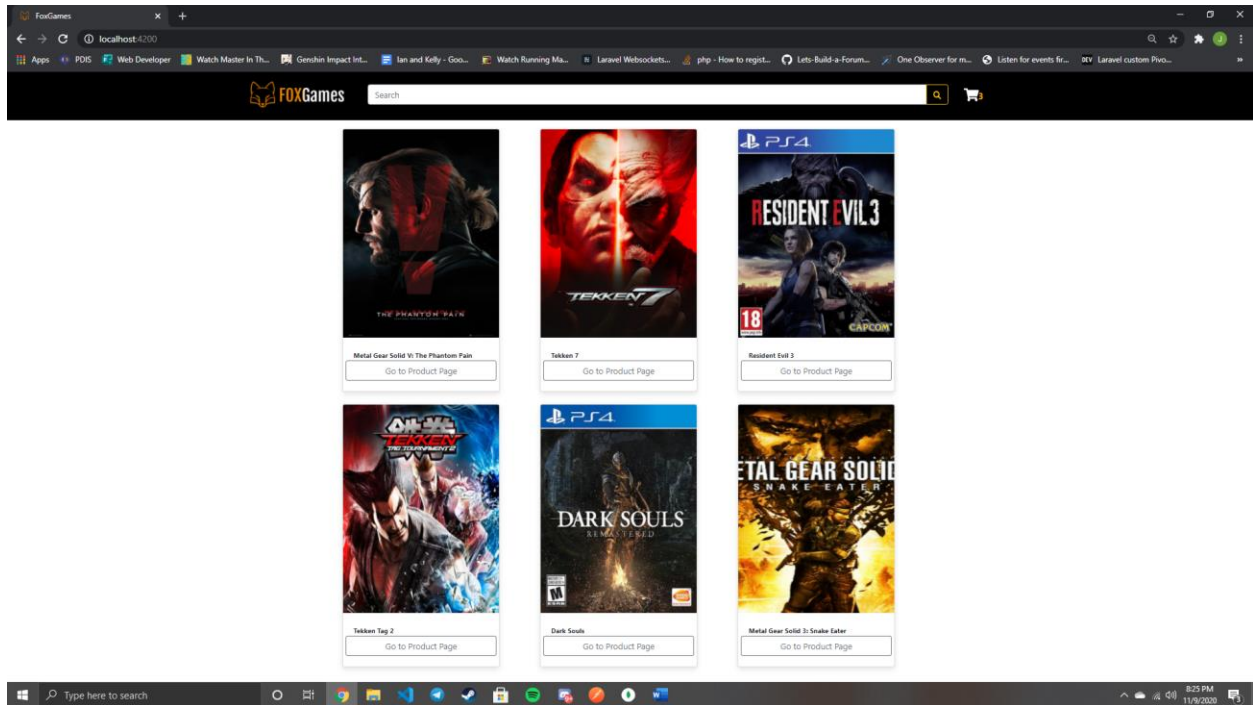

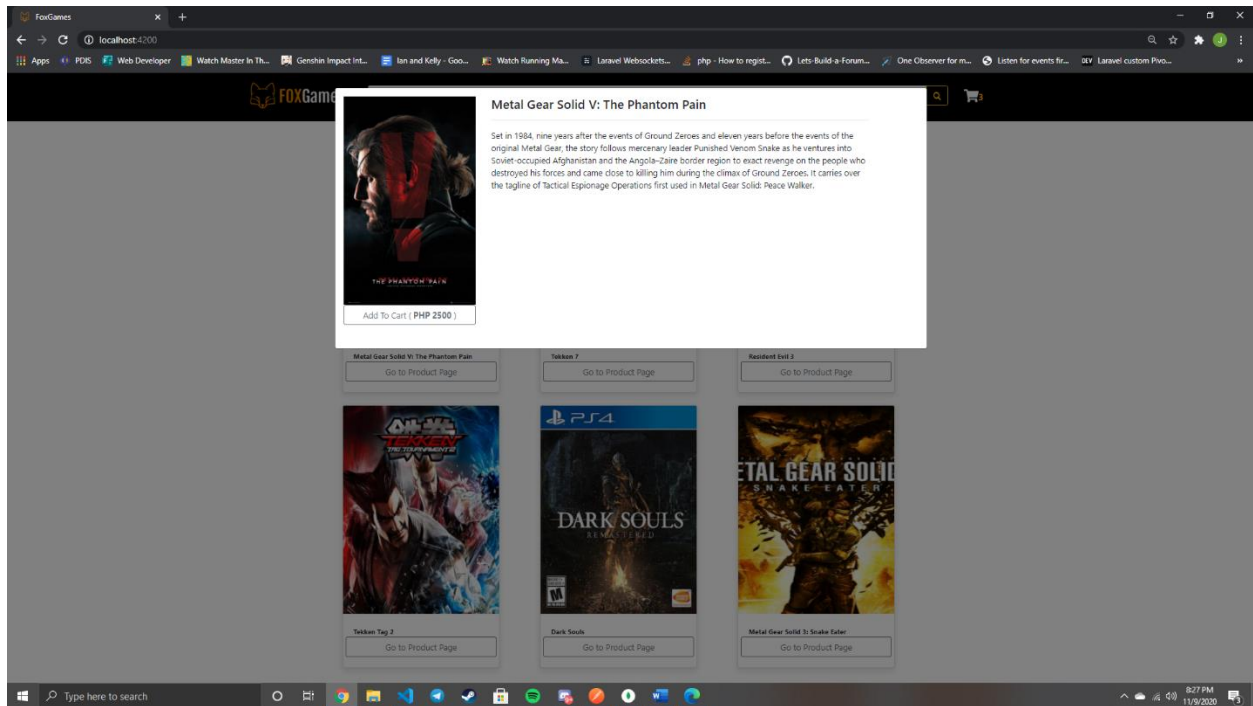

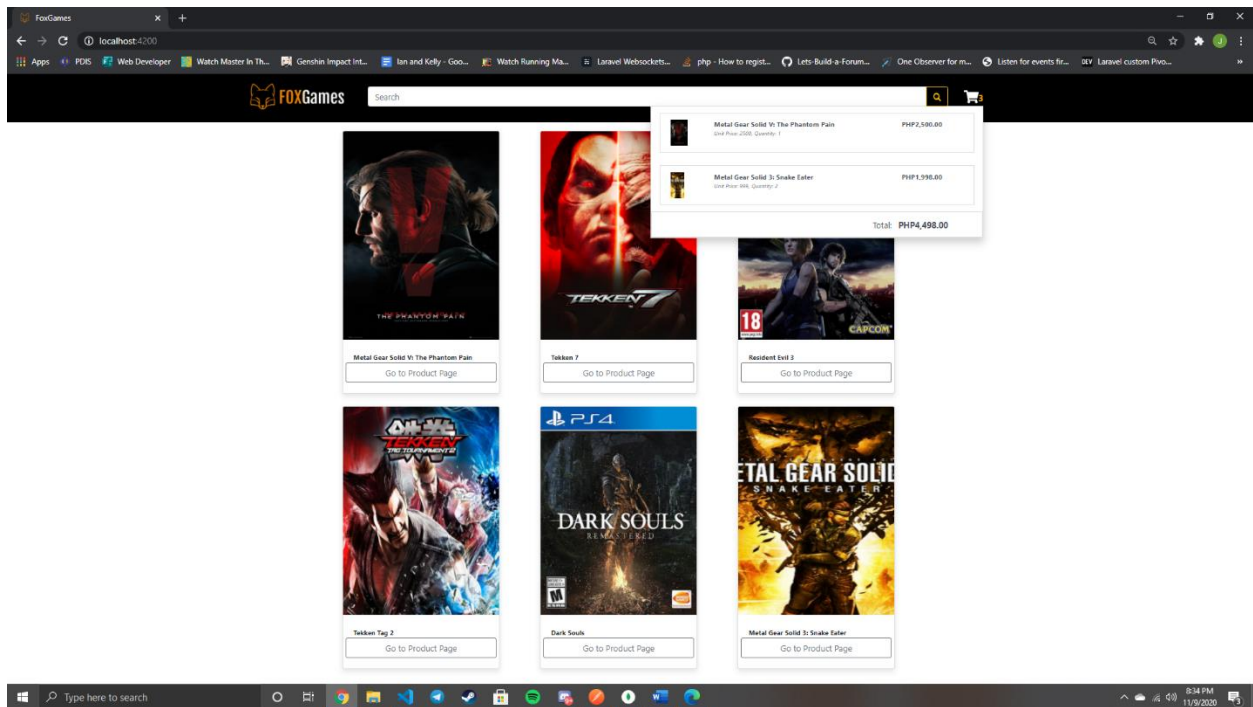

- **FEATURE: List all Products**
- Home Page will immediately contain all of the games preloaded in the database (assuming user has imported games.json)
- Cart will immediately contain 3 items for Testing Purposes
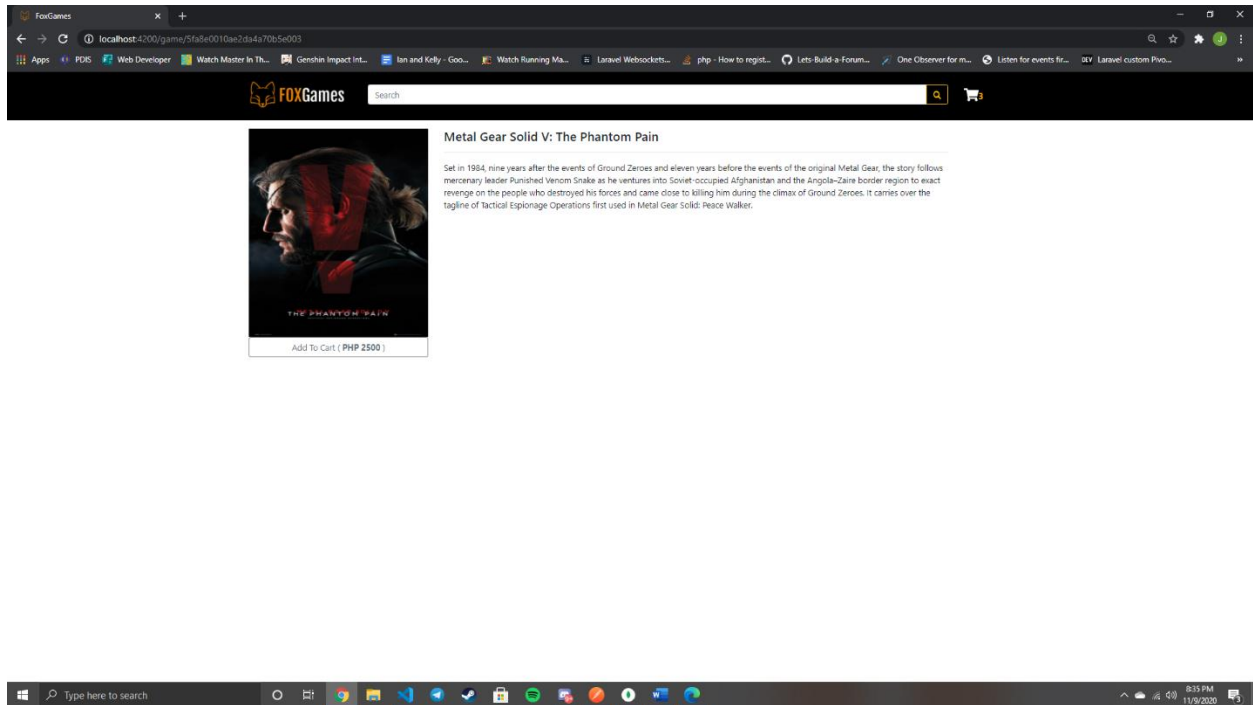

Screen 2: Show Product (Via Modal)

- **FEATURE: View Product (via Modal)**
    - o Show Title of the Game, Description, Image, and Price
- **FEATURE: Add to Cart**
    - o Just below the image of the Game is an add to cart feature. This will send an API Post to http://localhost:3000/cart
    - o Cart is saved through the database. Hence, refreshing the page will not make the cart items disappear.
- This modal is accessible by clicking the body of the Item in the Home Page
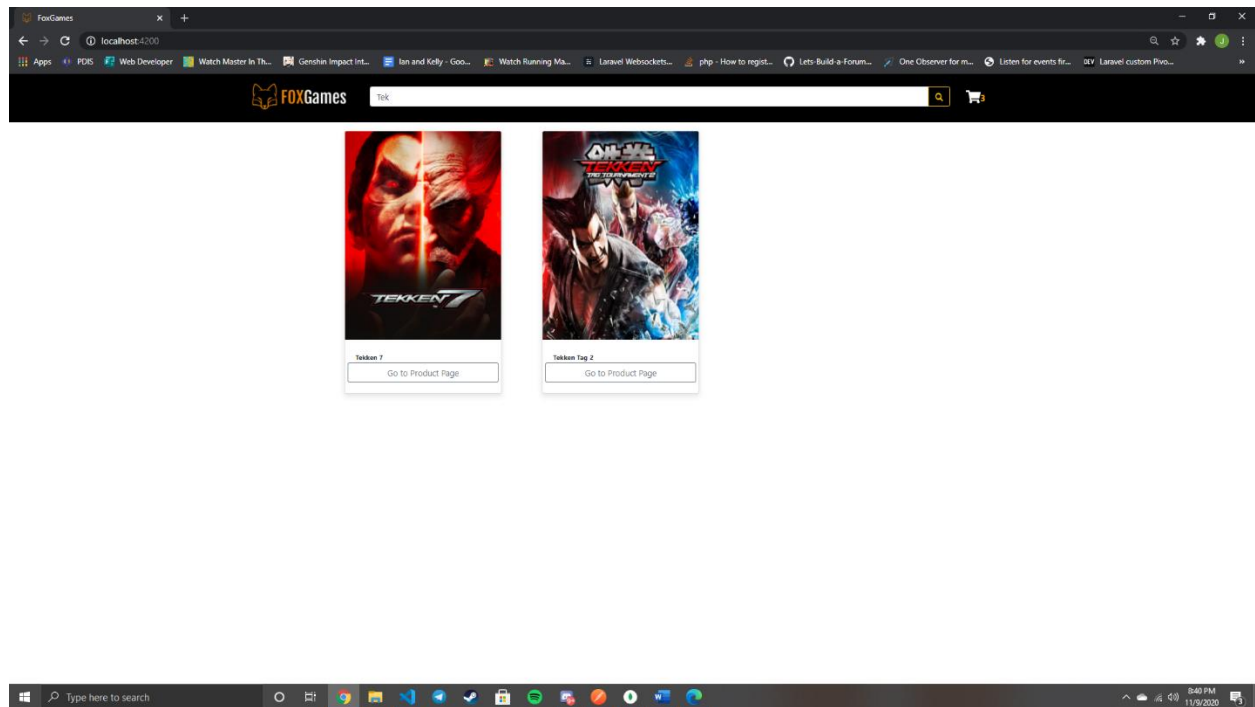

Screen 3: Cart Functionality

- Additional feature to display the contents of the cart along with the total price of the entire cart.
- Accessible by HOVERING on the shopping cart icon on the upper right side of the navigation bar.

Screen 4: Product Page

- **FEATURE: View Product (via API call)**
- Extremely similar to the modal for Show Product. Also contains an add to cart feature that behaves exactly the same as the one in the modal.
- Uses http://localhost:3000/game/{id} to get the data of the specified game.

Screen 5: Search

- **FEATURE: Product Search Engine**
- Used the chars "Tek" to search for all Games with the word "Tek" on their name.
